Agrowell

www.agrowell.com.tr

Agrowell is a leading agriculture company promising you nothing less than the “perfect product”. We show our profound gratitude for Mother Nature, who provides us with fertile lands, by constantly working to offer high-quality crops to the people around the globe.

OUR PRODUCT

We are proudly aware of the fact that no matter what we grow, the products will always meet the high criteria of our customers. Yet we do not limit ourselves with the commodities we introduce since we are an innovative company that constantly expands. Here are the products our team has specialized in growing in order to provide you with the best crops possible.

Scarlet Spur Apple

Growing in our fertile lands, scarlet spur apple has a dark red color and white thick flesh. The fruitful trees produce sweet, juicy, and thick fruits in large amounts.

We harvest the crops approximately at the end of September, depending on the weather circumstances.

Red Chief Apple

Red chief apple trees bear abundant products which we harvest around mid-September when they get fully ripe.

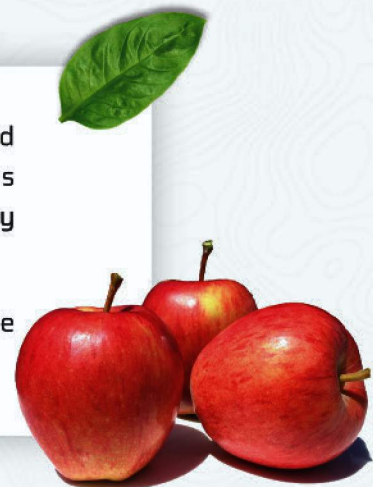

Fruits don't grow larger than medium-sized apples even at their most ripe form. Nevertheless, they are one of the most delicious types of apple we have to offer.

Gala Apple

Gala is the most widely known and regularly sold apple around the globe as it is seen in the northern and southern hemispheres at the same time. It is a reliable product that offers good quality while growing in both cold and warm temperatures.

August particularly in southern Turkey, but its mildly sweet taste and crisp fresh are very popular throughout the year.

Golden Apple

Golden apples are versatile and can be sharp flavored or sweet and rich in taste depending on the type. The Mediterranean and Aegean regions in Turkey are excellent locations for golden apples to grow in since they need warm temperatures.

Knowing that they keep fresh for a long time when harvested perfectly ripe, our team of experts offers fresh and high-quality apples to our clients.

Granny Smith

Thanks to their tough skin and outstanding storing qualities, Granny Smith apples were one of the first varieties to be shipped to international markets. Warm temperature and sunshine are required for fruits to ripe fully, making Turkey one of the best places to grow granny smith apples in.

A Fruits we harvest have a bright green exterior along with a perfectly sour taste and are very convenient as they produce abundant crops regularly.

Star Crimson Delicious Apple

Although its origins are in the USA, star crimson delicious apple is among the most commonly produced apples in Turkey.

Our trees yield high-quality fruits that are harvested towards the end of September. The exterior of the apple is bright purplish-red on a yellow texture. We offer our clients a very juicy and delicious type of apple with a tough flesh.

StarkSpur Apple

Growing in our fertile lands, scarlet spur apple has a dark red color and white thick flesh.

The fruitful trees produce sweet, juicy, and thick fruits in large amounts. We harvest the crops approximately at the end of September, depending on the weather circumstances.

THANK YOU!
